Projects

Mini Project **Automatic Letter Box.**

The objective of the project is to notify people about letters which are dropped inside the letterbox of their residence. The Automatic Letter Box consists of an electronic circuit, a receiving plate which senses the dropped letter in a letterbox and triggers the circuit. The red light flashes when the letter is dropped inside and the green light flashes when the letterbox is empty.

Main Project **Plant Discovery.**

This project is about a desktop based application wherein a plant is identified using leaf recognition program based on specific characteristics extracted from photo taken on a mobile camera.
